# CONCEPTUAL AND SEMANTIC DIVERSITY

# CONCLUSIONS

- Co-creation is a non-professionalised, polysemantic practice
- Meta-knowledge is unevenly distributed
  - Awareness of power relations, facilitation, joint problem formulation
  - Understanding of the purpose of SNODE's study
  - Other similar processes
- Universities can advance practitioners' meta-knowledge on co-creation
  - 1: Nomenclature, conceptualisation, self-awareness
  - 2: Adjacency to practice, professional education, facilitation--> Centers of co-production

# THANK YOU!
